Hey Cogan (and Florence),

I work with Chris Bizon on the FRINK team. He has asked me to track down the sample queries that the different Theme 1 (T1) groups listed on their data sheets. I have downloaded all available data sheets from proto-okn.net. The only group for which there is no data sheet is Rural Resilience. Do either of you (Cogan or Florence) have a data sheet for them?

Also, Cogan, Chris thought that the T1 groups might have provided some SPARQL for their queries but that it might have been removed to make those data sheets shorter. I do not see any SPARQL in any of the data sheets. Was there any SPARQL included for any of the queries? If so, would you either share the original data sheets with me or connect me to whoever may have that information?

Thanks,  
Laura Christopherson
