FOR QUESTIONS ABOUT THE STUDY, CONTACT:

(Michelle C. Odden, PhD, 1701 Page Mill Rd., Palo Alto, CA 94304, (650) 721-0230, modden@stanford.edu)

DESCRIPTION:

You are invited to participate in a research study on life space, or the space within which people live, work, and recreate. Based on a custom iPhone Life Space application, we will develop individual life space maps (geographic footprint) in order to evaluate the association of aspects of environmental features with health and well-being. This research study is looking for 120 StrokeCog participants to be enrolled. Stanford University expects to enroll 120 research study participants.

To participate in this study, you will download the LifeSpace App and complete the consent form. As a part of this research study, you will be asked to sign in using your AppleID. To do this, you will have to review and agree to the LifeSpace App Privacy Policy. This document is separate from this consent form.

The LifeSpace App will passively capture your location for two weeks. Each evening, you will complete a brief survey of four questions on the app.

X
