Content Authenticity Initiative

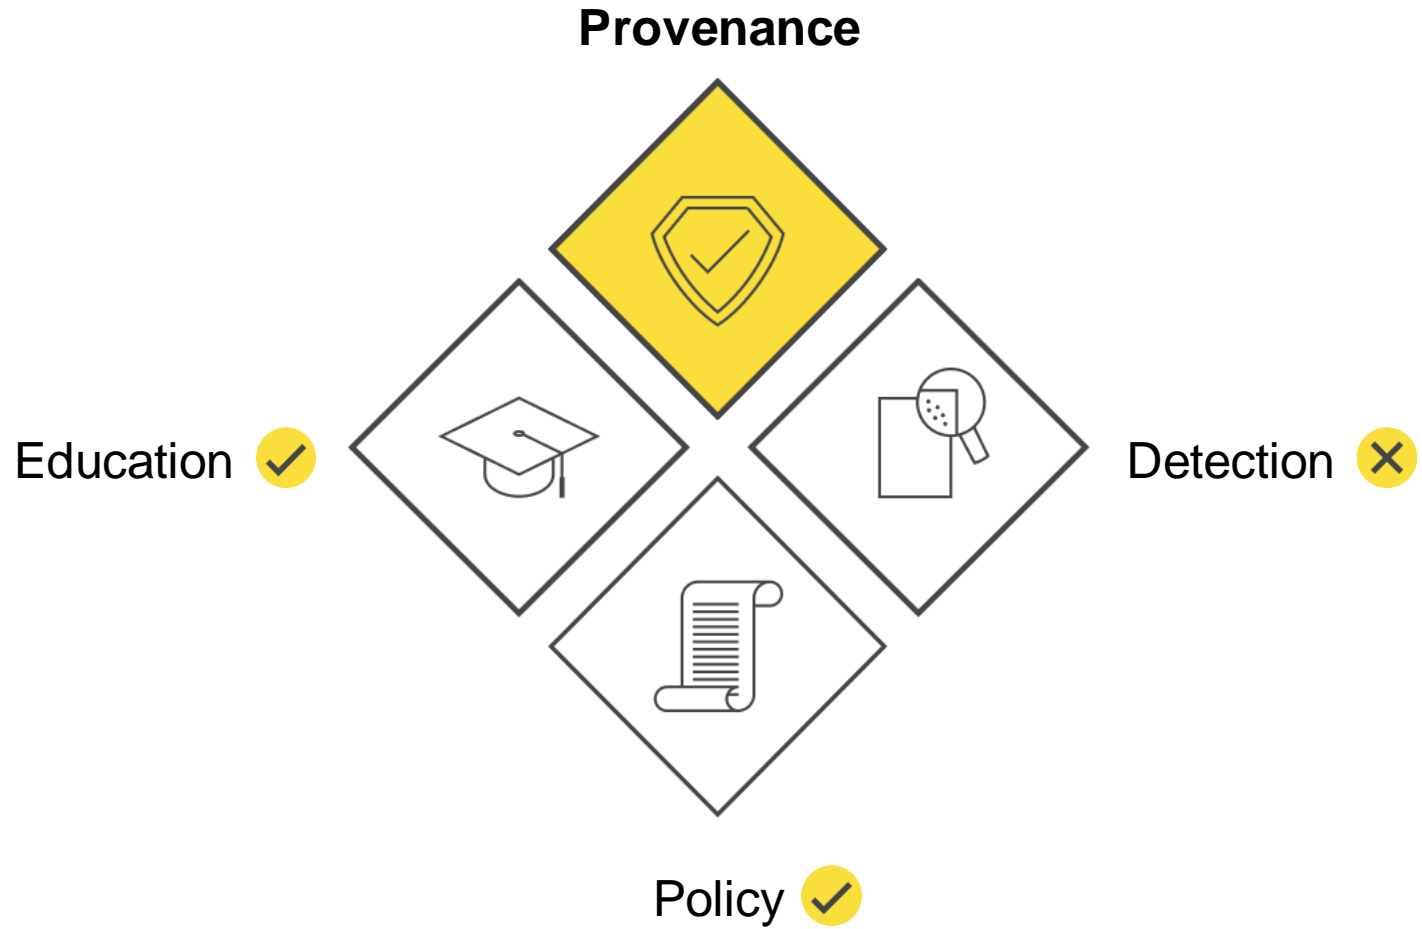

C2PA: Authenticity in the Age of AI

Andy Parsons, Adobe

Pillars of Transparency and Authenticity

Provenance

The basic trustworthy facts about the origins of a piece of digital content (image, video, audio, document)

content credentials

What are Content Credentials?

- A new kind of **metadata** for images, audio, video (including streaming and live)
- **Context** attached to content
- Provable evidence as to **what** media is and how it was made.
- A vehicle for authentic storytelling through **transparency**
- A way for creators and companies to achieve **attribution** for the content they produce (using C2PA extensions)
- A foundation for consumers to make informed **trust** decisions

PRODUCED WITH ?

Adobe Photoshop 24.1.1

EDITS AND ACTIVITY ?

AI tools
Edited with artificial intelligence or machine learning tools

Color adjustments
Changed tone, saturation, etc.

Combined assets
Composited 2 or more assets

Imported assets
Added images, videos, etc.

What must the solution have?

How Content Credentials solves

Tamper-evident connection to content	Cryptographic binding to pixels, frames, fragments
Resiliency	Content Credentials Cloud and fingerprinting
Privacy	Redaction
Trust	PKI, signatures and certs, not (necessarily) blockchain
Standards	 C2PA JDF/Linux Foundation
Identity	Verifiable Credentials, KYC, social media
Outstanding UX	 C2PA UX TF
Implementation ease	CAI open-source tools
Community of adopters	 CAI Discord, events, showcases

Coalition for Content Provenance and Authenticity (C2PA)

- Non-profit, run in the Linux Foundation
- Steering Co: Adobe, BBC, Google, Intel, Microsoft, Publicis, Sony, Truepic
- Spec and guidance available now, v2.0
- Addresses images, video, audio, documents
- Threats and harms + UX conventions

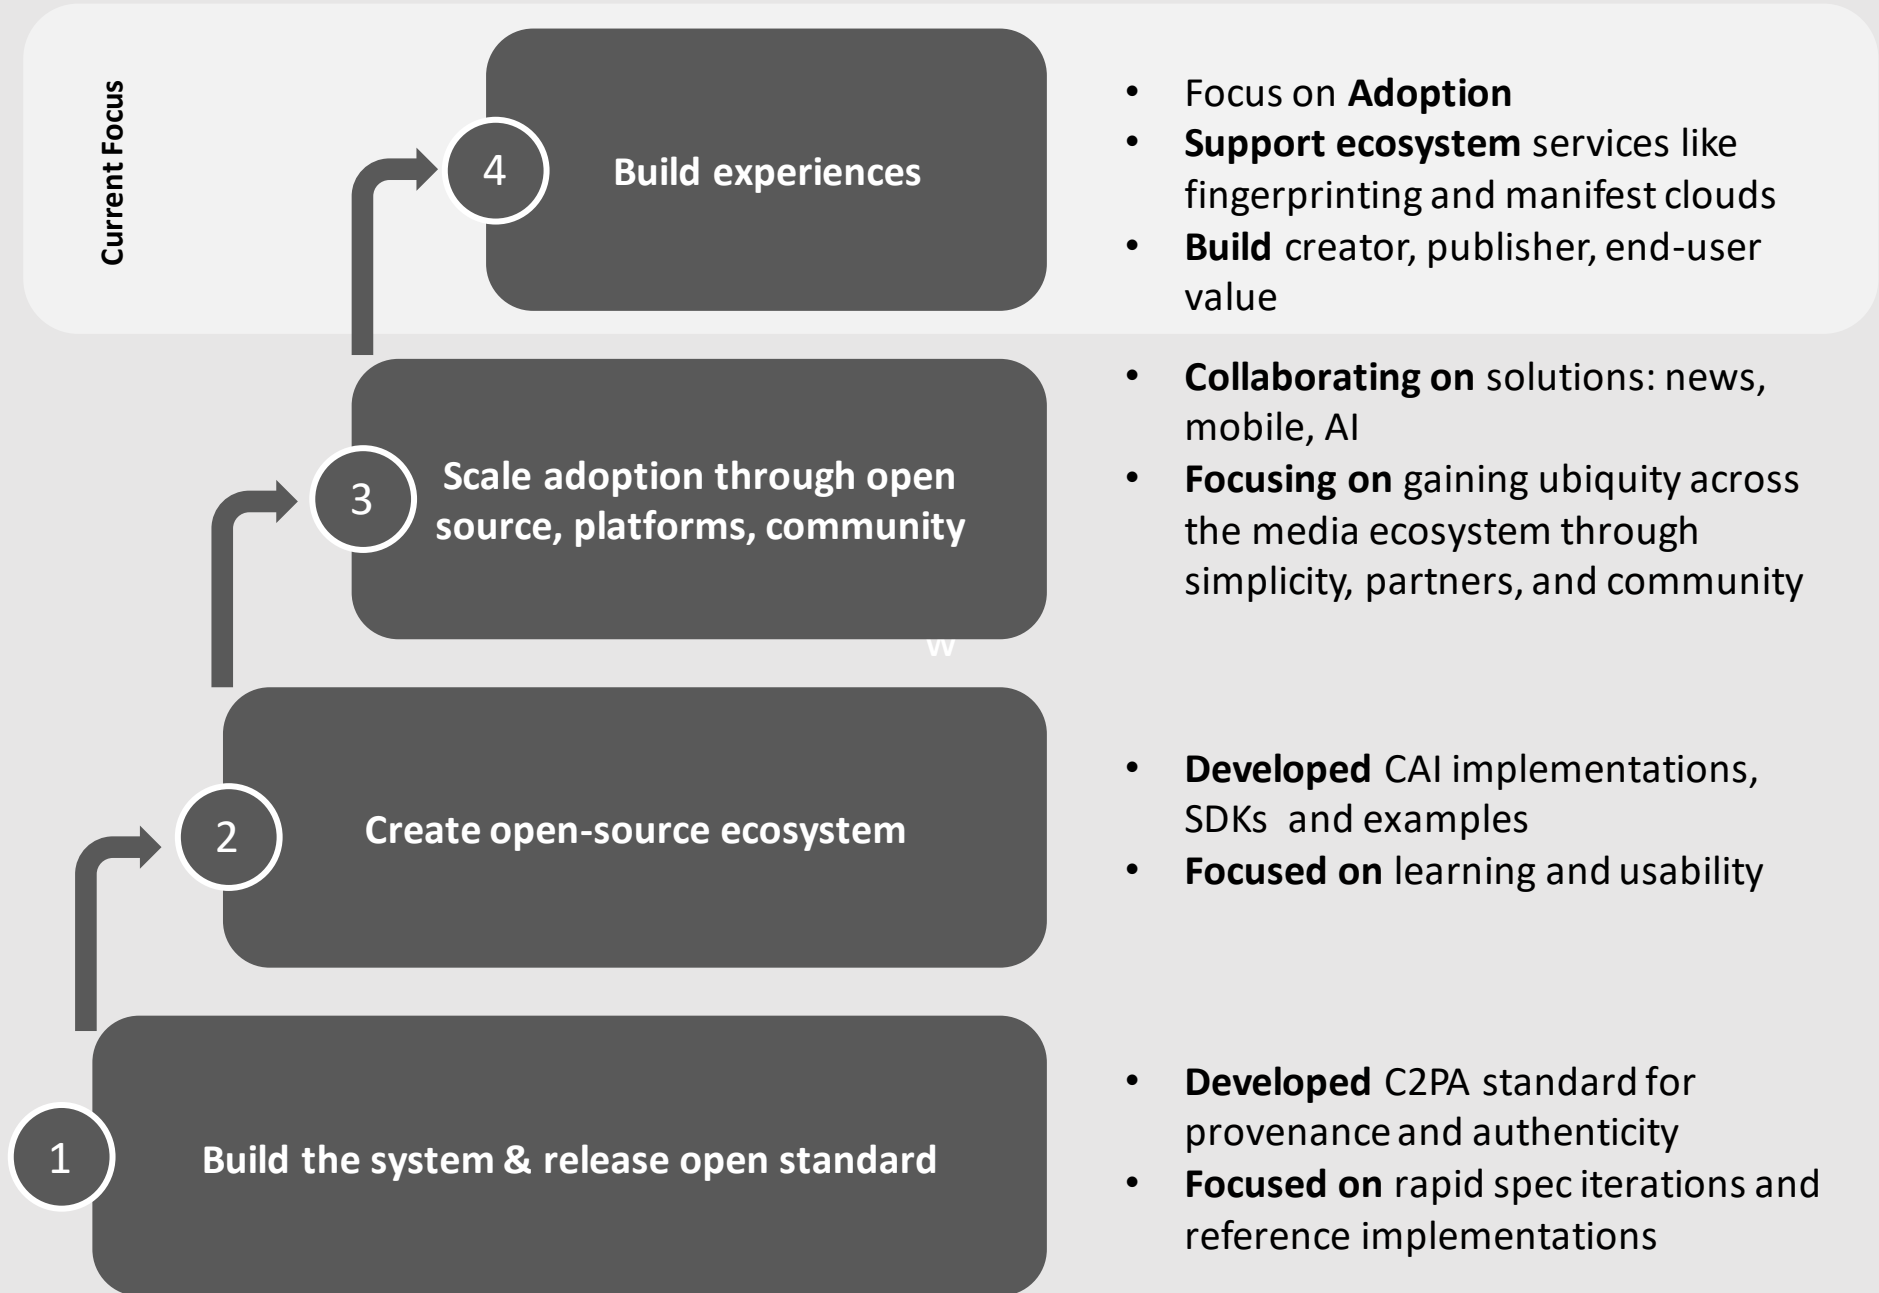

The Coalition for Content Provenance and Authenticity (C2PA)

- ▶ Standards development organization (SDO)
- ▶ JDF within Linux Foundation
- ▶ v1.0 C2PA Specification released Jan 2022

Content Credentials everywhere.

The CAI Open-source toolkit for C2PA

JavaScript SDK

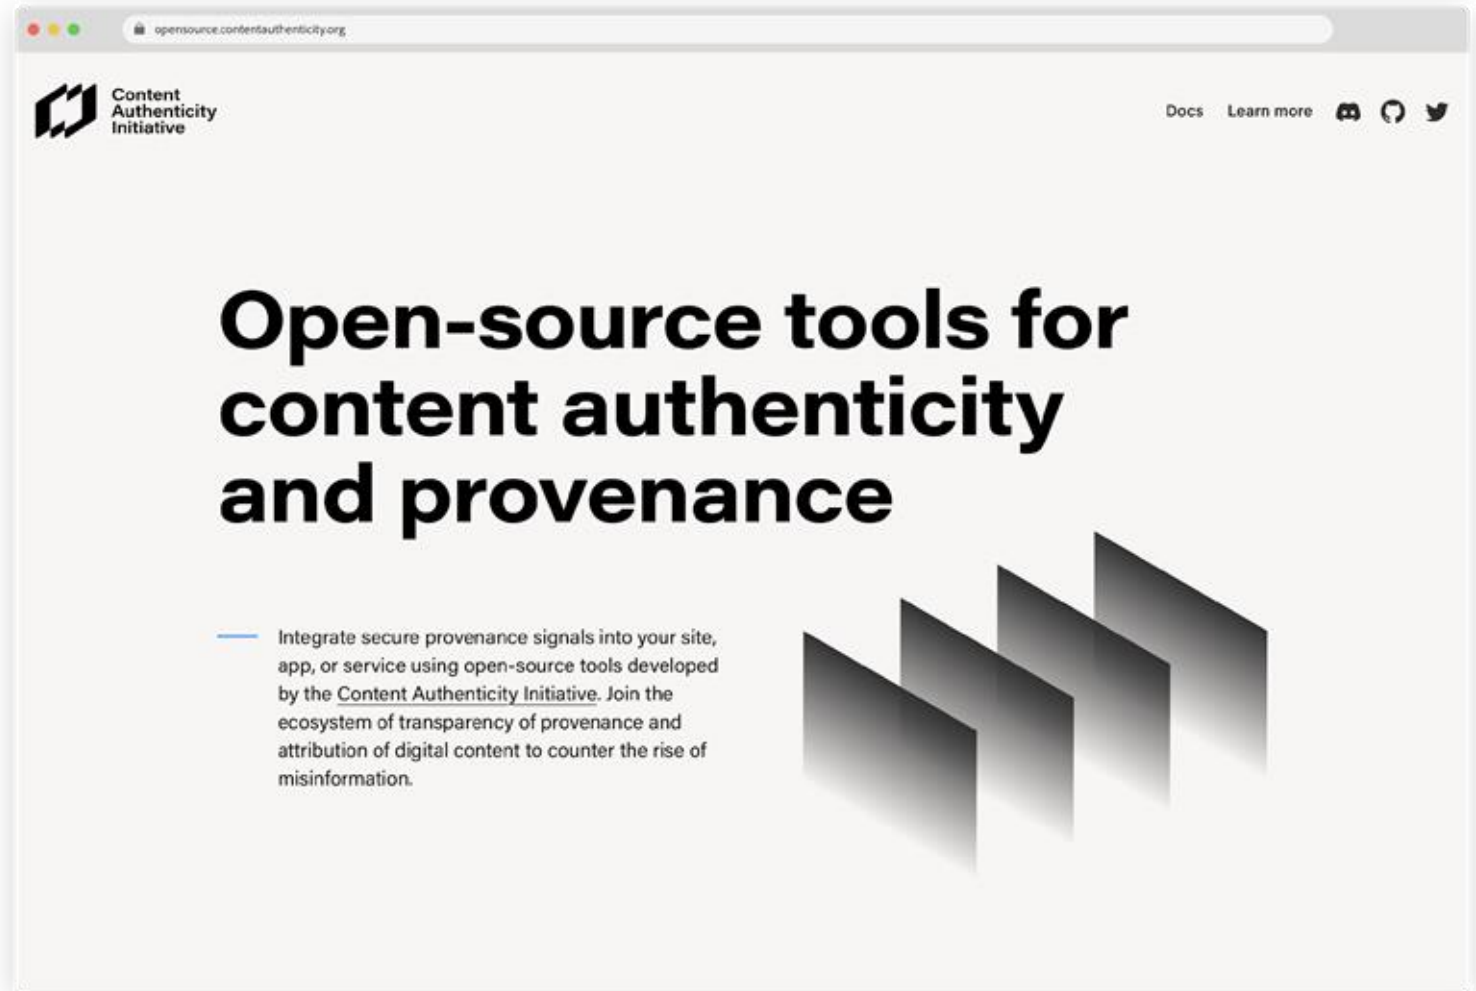

Develop rich, browser-based experiences with content credentials.

C2PA Tool

Create, verify and explore content credentials on the command line.

Rust SDK

Customize applications across desktop, mobile, and services to create, verify, and display content credentials via our Rust library.
