Experience

Jan 2022 - PRESENT

Vtiger, Bengaluru – *Software Developer*

- Created backend service for integrating Prismic (https://prismic.io/) CMS with our services in Python using Flask
- Coded location-based content rendering on the product.
- Worked on health-checks and uptime services for products.
- Reduced page load times by 50% implementing a redis based caching system for the CMS
- Added intermediary API response caching using MongoDB
- Single-handedly worked on the product UI using Vanilla JS
- Created tooling for prismic CMS so that non-developers can use it
- Modularized HTML templates using Jinja
- Managed server configuration using apache2 and wsgi for end to end deployment
- Migrated legacy website to NextJs

Skills

Web Development, Python, Javascript, HTML/CSS, Flask, Redis, MongoDB, Ansible, Docker, Jinja2, ReactJS
