Task List:

- **Inventory:** Standalone tasks need inventory status too.
- **Notes:** Need an icon to denote that there is a special instruction regarding that item.
- **Prepared Tasks:** Prepared items disappear from this list when the order is closed.
- **Calendar:** Kind of useless unless it could be used for appointments for Key FOBs.

Inventory List:

- **Partial Quantities:** No way (other than special instructions) to depict that you are ordering a partial quantity unless they are separate line items. Still have to receive the whole quantity to move it along, which could be confusing to some people.
