

LibMambaUnsatisfiableError: Encountered problems while solving:

- package libtiledbvcf-0.35.0-hfffce77_0 requires tiledb >=2.26.0,<2.27.0a0, but none of the providers can be installed

Could not solve for environment specs

The following packages are incompatible

- minimap2 2.28** is installable with the potential options
 - minimap2 2.28 would require
 - libzlib >=1.2.13,<1.3.0a0 , which can be installed;
 - minimap2 2.28 would require
 - k8 with the potential options
 - k8 0.2.5 would require
 - zlib >=1.2.11,<1.3.0a0 , which can be installed;
 - k8 0.2.5 would require
 - zlib >=1.2.13,<1.3.0a0 , which can be installed;
 - k8 0.2.5 would require
 - libzlib >=1.2.13,<1.3.0a0 , which can be installed;
 - k8 [1.0|1.1|1.2] would require
 - python_abi 3.8.* *_cp38 with the potential options
 - python_abi 3.8 would require
 - python 3.8.* , which can be installed;
 - python_abi 3.8, which can be installed;
- python 3.10** is uninstallable because there are no viable options
 - python [3.10.0|3.10.10|...|3.10.9] conflicts with any installable versions previously reported;
 - python [3.10.0|3.10.1|...|3.10.9] would require
 - python_abi 3.10.* *_cp310, which conflicts with any installable versions previously reported;
 - python 3.10.15 would require
 - libsqlite >=3.46.1,<4.0a0 , which requires
 - libzlib >=1.3.1,<2.0a0 but there are no viable options
 - libzlib 1.3.1 would require
 - zlib 1.3.1 *_1, which conflicts with any installable versions previously reported;
 - libzlib 1.3.1 would require
 - zlib 1.3.1 *_0, which conflicts with any installable versions previously reported;
 - libzlib >=1.3.1,<2.0a0 , which cannot be installed (as previously explained);
 - python_abi 3.10.* *_cp310, which conflicts with any installable versions previously reported;
- tiledbvcf-py 0.35.0** is uninstallable because it requires
 - libtiledbvcf 0.35.0 hfffce77_0, which requires
 - tiledb >=2.26.0,<2.27.0a0 , which requires
 - libzlib >=1.3.1,<2.0a0 , which cannot be installed (as previously explained).
