Relevant Skills

Smart Mini Greenhouse System
- Designed and developed an IoT-enabled Smart Mini Greenhouse System with real-time environmental monitoring and automated control as part of a two-person team. Led the coding and implementation of embedded systems, sensor integration, and web-based monitoring.
- Integrated the system with the internet using Blynk, enabling remote management via Wi-Fi for seamless monitoring and control.

St. Francis Of Assisi Chapel Website   **(Private Repositories)**
- Designed and developed the user interface and user experience for the St. Francis of Assisi Chapel website, ensuring a visually appealing, user-friendly, and responsive layout for seamless navigation and accessibility.
- Headed the development of the St. Francis of Assisi Chapel website as part of a two-person engineering team, crafting a seamless and accessible digital platform to serve the chapel and its community.

I-VoteNow
- Developed an innovative online voting application that streamlines the electoral process, ensuring security, accessibility, and integrity for remote voters.
- Built a Windows application for admins to manage website content, enabling seamless control over elections and voter data.

Selected Projects

QuizAce
Developed to provide an easily accessible quiz app for everyone powered by the Open Trivia API.

PomoTime
A Pomodoro timer designed to improve productivity by breaking work into focused intervals, called pomodoros, with regular breaks.

SafePayroll
A modern payroll system developed to help HR manage employee records and accurately calculate payroll figures, built using Visual Basic with a MySQL database.

Certifications

Github Foundations
GitHub basics like repositories, commits, branching, markdowns, and project management

Get the most out of Jira
Experienced in Agile project management with Jira for workflow optimization, progress tracking, and team collaboration.

UI/UX Tesda Certifications
Certified in UI/UX design from TESDA, skilled in creating user-centered designs, enhancing usability, and improving digital experiences.
