

**Program A** *Standard Program* (4 Applications)

Application Description

- 1) **Early Spring** - A granular application consisting of a high quality, slow release fertilizer, combined with pre-emergent herbicide for control of crabgrass and other grassy weeds.

\$ 228.<sup>00</sup>

Applied at the rate of 1 lb. of nitrogen per 1,000 square feet.

- 2) **Late Spring** - a liquid application consisting of high quality wide range spectrum liquid herbicide to control broad leaf weeds.

\$ 228.<sup>00</sup>

- 3) **Summer** - A granular application consisting of high quality fertilizer and micronutrients. If weeds are still a problem, they will be sprayed.

\$ 228.<sup>00</sup>

Applied at the rate of 1 lb. of nitrogen per 1,000 square feet.

- 4) **Fall** - A granular application consisting of high quality fertilizer.

\$ 228.<sup>00</sup>

Applied at the rate of 1 lb. of nitrogen per 1,000 square feet.

**Program B** *Deluxe Program*

(same as Program A above, with the addition of lawn aeration - late summer/early fall)

Cost of aeration -

\$ \_\_\_\_\_

**Grub Control** *Recommended*

(insecticide applied in late May through June)
