

Dynamic Accordion FAQ Web Part

After entering the required information in the Settings pane and publishing the page, the FAQ web part displays only the category headers of the accordion, but not the content.

Expected Steps:

- Add the Dynamic Accordion app to the SharePoint site
- Add the web part to the page
- Select a List (that includes a choice type column)
- Select the different values to display on the accordion
- Select any additional configurations
- Click Apply

One of the differences we noticed was that before we could skip the “Select the (Choice) Column for Categories” field and enter the other settings. Now, we are forced to enter in the “Select the (Choice) Column for Categories” field. The other field are not active until we do so.

Dynamic Accordion Section

Settings

BEFORE

Select a list

FAQ Test List

Select the (Choice) Column for Categories.

Select the Choice value for filter.

Teams

Select the Column for Accordion Title Rows.

Title - [Title]

Select the Column for Accordion Content.

Answer - [Answer]

Select the Column for Accordion Sort Rows.

FAQ Test List

Select the (Choice) Column for Categories.

Select the Choice value for filter.

Select the Column for Accordion Title Rows.

Select the Column for Accordion Content.

Select the Column for Accordion Sort Rows.

Sort type

Ascending

Allow zero expanded

On

Allow multi expand

Off

After Publishing the page, the accordion is supposed to appear. Here is what we are seeing/not seeing. Now vs. before we can across the issue. Nothing shows up in the web part, even though technically the same info has been input (minus being forced to add the Select the (Choice) Column for Categories).

Teams

What it looked like on the SP page before the issue.

> How do I get a Teams Phone Number?

> Can I delete the General Channel Folder from the SharePoint site associated with a Team?

> Can I chat with people from other Agencies in Teams?

> Can I search for a specific chat by a person's name?

> How do I assign an owner to an Orphaned Team?

> How can I archive a Team?

SharePoint

What it looks like now.
