

# What to click:

1. Visit <https://github.com/sounddrill31/links-card-website>.

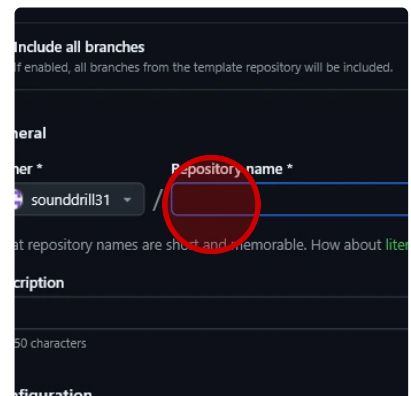

2. Click "Use this template " .

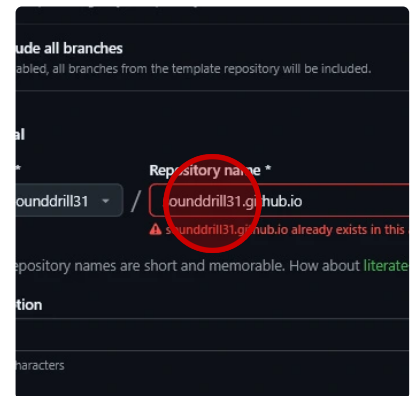

3. Click "Create a new repository" link.

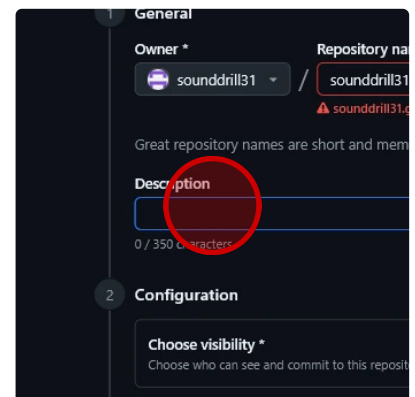

4. Prepare to name your repository.

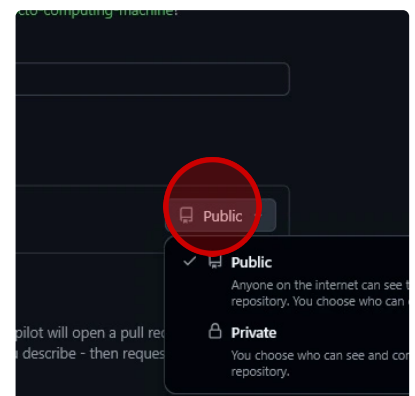

5. Put your repo name here: gh\_username.github.io is the default Github Pages URL, recommended.

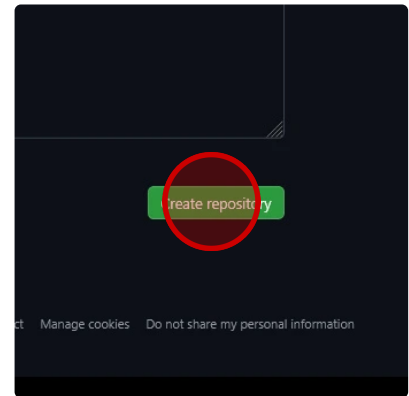

6. Add a description if you'd like.

7. Keep it either Private or Public.

8. Click "Create repository" .
