

## **Virtual Mouse**

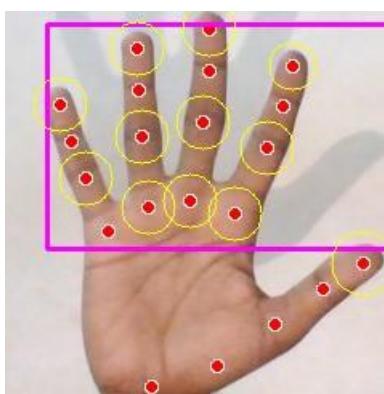

Instruction to be followed:

Always spread out your hands for the best working of the software.

Example:

**Dotted hand:**

Follow the below illustrations to perform respective actions.

The respected points should touch for the function to work (Refer dotted image).

### **Left click (single click):**

### **Double click:**

**Right click:**

**Scroll down:**

**Scroll up:**

**Volume down:**

**Volume up:**

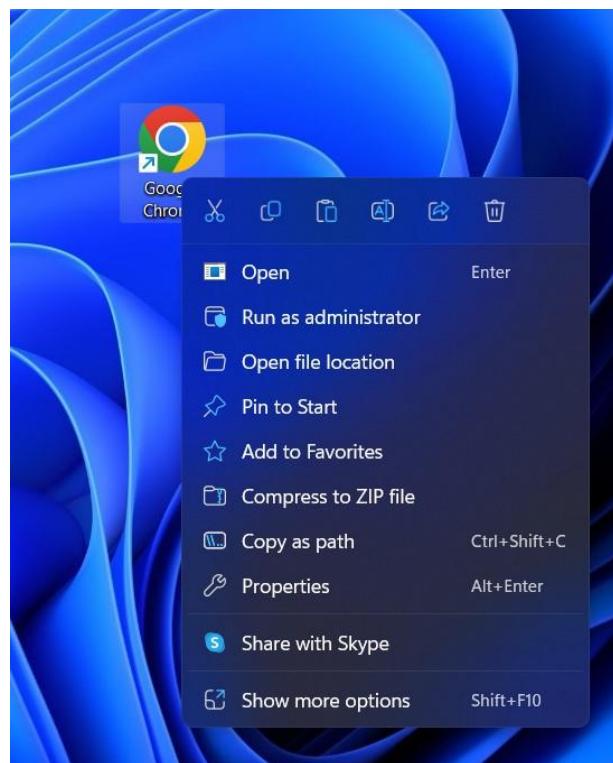

## Shortcut key (ctrl + alt + c):

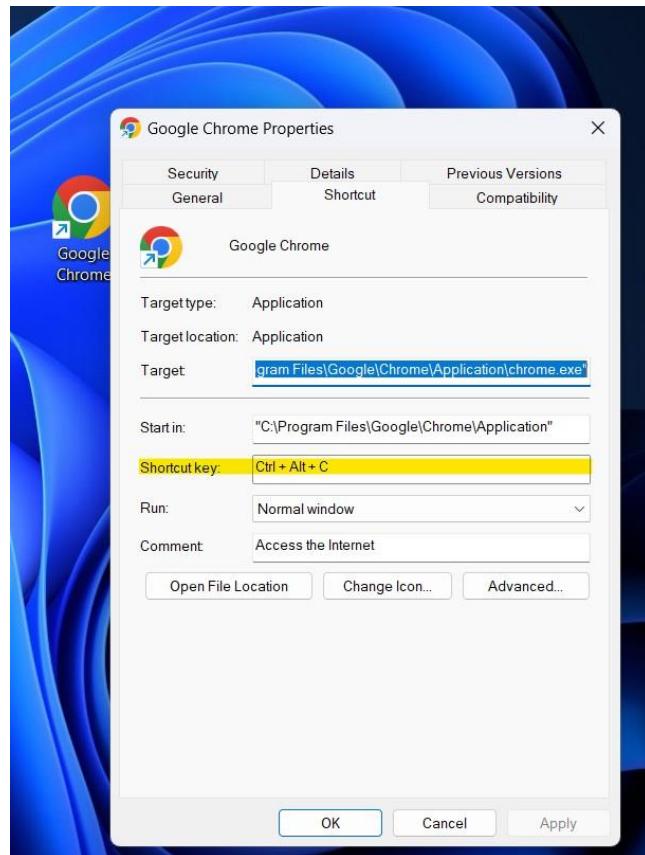

For this shortcut key to work first you should set up the shortcut key for a desired program.

Steps to setup shortcut key:

1. **Right click** on the application you want to set shortcut for and select **Properties** (in this case I select chrome).

2. Select the shortcut key box and type “ctrl + alt + c”.

3. Then click **Apply** and then **Ok**.

4. Now your shortcut function is ready.

Steps to close the Application:

1. Select the window where the video is being displayed with single click and then press “Esc” button on your keyboard. This will close the video window (this will also stop the hand tracking and mouse controlling function).
2. And then you can close the application by simply clicking the “X” on the top right corner of the window.
