What users see when prompted to authenticate

[Hide advanced settings](#)

 Changing the settings below might block existing users from logging in. [Learn why](#)

Hostname

objective-buck-n08nqpyr2y.projects.oryapis.com

The hostname of the log in page. Leave empty if you are using the account experience.

Origins

`https://myexample.org, android:apk-key-hash:..., or ios:bundle-id:...`

+

`https://objective-buck-n08nqpyr2y.projects.oryapis.com`

Web origins must match scheme://domain[:port] (for example `https://myexample.org`). Android and iOS origins such as `android:apk-key-hash:...` or `ios:bundle-id:...` are also supported.
